

## SKILLS SUMMARY

- Professional experience prototyping, profiling and seeing projects through conception to completion
- Friendly, confident, out-going and reliable; embraces challenge
- Working experience with C++, C#, Java, JavaScript, CSS, Delphi, Flex, Perl
- Hobby and academic experience with Arduino, Teensy, soldering, ARM, VHDL, Verilog, Assembly
- Experienced using Adobe Photoshop, Adobe Premiere, Corel Draw and discussing designs with customers

## WORK EXPERIENCE

### Code Connect

Co-founder

Jan '14 - present

Waterloo, ON

- Builds Microsoft Visual Studio extensions using C# Roslyn compiler
- Develops an application using MVVM and async patterns, WPF commanding and XAML front end
- Works with websites and databases deployed on Amazon and Azure clouds
- Takes and edits videos. Designs UI and promotional material

### Amazon.com

Software Development Engineering intern

Sept - Dec '13

Seattle, WA

- Developed a feature that increased capabilities of the ordering pipeline
- Designed new user interfaces and evaluated their usage patterns using paper and HTML prototypes
- Adhered to constraints and upheld highest security standards to ensure correct billing

### Sandvine

Software Engineering Co-op

Sept - Dec '12

Waterloo, ON

- Developed an ActionScript framework for exporting spreadsheets from third party Flex components
- Contributed to development of a code editor and associated parser using JavaCC
- Effectively worked with geographically distributed teams under tight deadlines during product release

### Schlumberger Information Solutions

Software Engineer

Jan - Apr '12

Stavanger, Norway

- Designed and developed WPF interface to control lights in three dimensions (Patent US20120254781)
- Created and implemented a novel approach to visualization of seismic data (Patent US20130235696), allowing for higher quality, fully interactive and real time rendering of geological features in 3D
- Built prototypes for novel input methods

### Schlumberger Water Services

Software Developer

May - Aug '11

Waterloo, ON

- Redesigned and implemented user interface for improved user experience of a commercial application
- Investigated bottlenecks in the code; optimized application's performance and responsiveness

# EDUCATION

University of Waterloo

September '09 – April '14

Bachelor of Applied Science, Honors **Computer Engineering** with **cognitive science minor** and distinction.

*Relevant courses:* Operating systems, Computer architecture, Compilers, Database systems, Adaptive algorithms, Intro to linguistics, Cognitive processes, Intro to cognitive science, User centered design methods

# PROJECTS

**Video blog: Raspberry Pi Smart Mirror** - [Coding with Amadeus on youtube.com](http://Coding with Amadeus on youtube.com) 2015 - current

- Video blog of building Smart Mirror for Windows 10 running on Raspberry Pi

**Elizabeth Malara's gallery** - [malara.ca](http://malara.ca) 2015

- Artist portfolio built with custom Jekyll templates

**WikiDive** - [amadeusw.com/WikiDive](http://amadeusw.com/WikiDive) 2015

- An unfinished experiment on cross domain requests using JSONP

**Source Browser** - [sourcebrowser.io](http://sourcebrowser.io) 2014

- Turns GitHub repositories into interactive source reference
- Built with ASP.MVC, uses Roslyn compiler and Lucene library.

**Aurora**, Philips Ambilight clone - [video at http://amadeusw.com](http://video at http://amadeusw.com) 2013

- Designed and built a lighting system casting realtime colors from the computer screen
- Wrote GUI and I/O in C# and image processing algorithm in C++/CLI
- Built with a custom-cut and drilled sheet of acrylic; Driven by an Arduino

**YouDJ** 2013

- Developed Windows 8 app that manages playlists and smoothly transitions between YouTube songs.
- Won the Microsoft Hackaton at Canadian Undergraduate Software Engineering Conference.

**OpenTTD**, contributions to an open source strategic game - <http://openttd.org/> 2006

- Gained exposure to revision control and code review process.

# INTERESTS

- Rock climbing, reading, cooking, snowboarding and playing volleyball
- Cognition and learning, and their applications in computer science
- Design, art, homemade hardware and software projects around the world
- Video game modifications – created maps and engine mods for Jedi Knight, a Quake III engine based game.
